Certificate Programs [1]

Power and Energy Systems

University of Houston is the "Energy University" in the energy capital of the world. In addition, Houston has a large base of power and energy industries that need talented engineers to meet their growing demands for performing critical electric energy related tasks. The programs directly support the uniquely diverse industrial and technological environment of the greater Houston area, which is involved in electrical power generation, consumption, expansion, conversion, and manufacturing. The programs were developed at the request of industry with participation from a significant number of prominent electrical industry representatives. The courses offered are designed to concentrate on global industrial workplace and market applications. Learn more [2]

Subsea Engineering

The UH Cullen College of Engineering’s subsea engineering online certificate program is not your typical online course. The flexible and innovative online program in subsea engineering includes live videos of lectures, interactive web-based discussions and opportunities for one-on-one learning experiences. The Cullen College offers two graduate certificates in subsea engineering—a certificate in subsea engineering and an advanced certificate in subsea engineering. Learn more [3]
